Owner: Tom Karl

**D**aily Activity Log was created by Law Enforcement Software Solutions to meet the needs of Police, Sheriff, and Public Safety Agencies. Daily Activity Log is a server and software solution for agencies that would like for their employees to log Daily Activity or "Incidents" from any workstation within the local area network. With Daily Activity Log all the user needs is a shortcut on their desktop to connect to the server.

**W**ith Daily Activity Log multiple users can log incidents from different workstations at the same time. Mobile laptop users that are on the same network as the server will have the ability to enter their daily activity logs before they clear the incident or end of their shift. The users can run a report and read about incidents handled by the previous shift. Supervisors will have the ability to quickly look up and view all incidents or search by incident type or
